

VIRUS ATTACK ON PERSONAL COMPUTER

Story 3: Virus Attack by installation of malicious software

Multiple applications are installed one after the other.

Mohan : What is this! The system has slowed down! And what are these applications! So many applications are installed automatically!

Kiran : This is a virus attack! We will have to format the system to get rid of it.

Kiran and Mohan regret installing an un-trusted software and losing all their data.

TIPS

- Always use genuine software and applications to avoid potential security lapses. Genuine software gets regular updates to protect your data from new cyber threats.
- Never download or install pirated software, applications etc. on your computer, laptops or hand-held devices. It is not only illegal but also increases your vulnerability to potential cyber threats.
- Always read the terms and conditions before installation of any application.
